## U.S. PUBLIC LAND SURVEY MONUMENT RECORD

Note: This form is intended and designed to fulfill all requirements of Wisconsin Administrative Code, Chapter A-E 7.08 U.S. Public Land Survey Monument Record (3) (a) (b) (c) (d) (e) (f) (g) (h) (i). An additional sheet may be added if necessary to conform with said requirements.

(a) Corner location: Township 35 North

Range 11 East/West

Town/City/Village Schoepke

County Oneida

(b) (f) (g) (h) Description of monument found at this corner and if it was accepted, state all evidence (material, testimonial, occupational, plats, records, other monuments) used as a basis for accepting. If not accepted or if nothing was found, state evidence used as basis for establishing location. If reestablished through lost corner proportionate methods, indicate all monuments, distances and directions used to establish. Indicate type of monument found or set and sign post. I re-established the Quarter Section Corner between Sections 2 and 3, T35N, R11E on the basis of the original calls and a personal witness. I tested the calls of the G.L.O. Survey of 1859 by Wm. E. Daugherty, Gov't Deputy Surveyor on a straight line between the northwest and the southwest Section Corner of Section 2, commencing at the northwest

Section Corner south on line:
G.L.O. Leave Swamp 16.87 chs Retracement Survey 17.12 chs
" " Right Bank Wolf River 33.30 chs " " 33.33 chs
" " Left Bank Wolf River 34.98 chs " " 34.33 chs

Set Quarter Section corner 36.87 chs. Re-established Dist. 36.87'.

Over the period of 131 years the river bed has been altered either by weather conditions or man. There is an old Section line road that runs north and south across the river, it appears dirt fill on the left bank has changed the river bed of this point. The corner position sets on the north edge of a cultivated field also evidence of a old fence running east. (See back side)

(c) (d) (e) Plan view of corner with ties to at least 4 witness monuments. If in disagreement with previously established corner, show the distances between the two corners and also indicate the ties to the disputed corner.

Set a 2-1/4" aluminum Oneida County Monument flush with the ground. (1) 4" White Spruce

Index No.

The position of the Quarter Section Corner was shown to Mr. Frank Meister, a life time resident, he agreed it was very close to the position his father had made reference to in 1945.

Proportional measurement was not acceptable position, it would not relate to existing local conditions.
