Corner monument restored.

By Cases Deputy

U.S. Public Land Survey Monument Record

Index No. N-19

History of original corner establishment:

Original corner was established during the course of the subdivision of T 38 N, R 11 E, which was started Aug. 30, 1859 and completed Sept. 5, 1859 by William E. Daughesty, Penuty Surveyor.

Original 8.T.'s:

8" Tamarack N 700 W 9 lks.
8" Tamarack S 5 W 17 lks.

Description of corner evidence found:

Found a GLO 6" dia. concrete monument bras cap 4" below the swamp. Found a 4"x4" wood post 1.4' NE

Found a 4"X4" Wood post 1.4"

Description of monument and accessories I established to perpetuate the original location of this corner.

Plazed and scribed the following new bearing tress:

4" Spruce N 66° E 37.29'
2" Spruce S 9° E 9.81' (Measurements are to a nail in t 3" Spruce S 37° W 20.32' side of the trees.)
2" Spruce N 23° W 10.58'

Signature Torre Dated at. Eagle Figer (County Surveyor, Registered Land Surveyor, or other duly authorized official) , Wis., this 20th day of September .. **19** 85 Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 2 of the witness monuments shown on the drawing in (d), above.

None. See sketch below.

Was the corner restored through acceptance of $\{1\}$ an obliterated evidence location, or, $\{2\}$ a found perpetuated location?

Sorner was restored through acceptance of a found perpetuated location.

Was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

No. See sketch below.
