## U.S. PUBLIC LAND SURVEY MONUMENT RECORD

Note: This form is intended and designed to fulfill all requirements of Wisconsin Administrative Code, Chapter A-E 7.08 U.S. Public Land Survey Monument Record (3)(a-i).

(a) CORNER LOCATION 1/4 Cor. of Secs. 10 & 15 Township 39 North Range 4 East of the 4th P.M. Town of Minocqua

WISCRS - Oneida County N: 251,677.40 USft E: 120,768.09 USft Datum: NAD 83(2011) GNSS Method: RTN - Offset GNSS Control: WISCORS VRS

## (b) HISTORY OF ORIGINAL CORNER ESTABLISHMENT

Original Surveyor: Alexander Anderson

Original Accessories:

Date of Survey

County of Oneida

Commenced: May 9, 1865 Completed: May 22, 1865 Birch 10" N40°E, 20 lks. Hemlock 10" S70°E, 11 lks.

(b)(f)(g)(h) Description of monument found at this corner and if it was accepted, state all evidence (material, testimonial, occupational, plats, records, other monuments) used as a basis for accepting. If not accepted or if nothing was found, state evidence used as basis for establishing location. If re-established through lost corner proportionate methods, indicate all monuments, distances and directions used to establish. Indicate type of monument and sign post found or set.

April, 1979: On OCS Map. No. C-1107, James Marquardt, RLS identifies the corner as a 2"x 30" iron pipe set, witnessed by: 8"w. birch N16°E, 17.9'; 10" maple S56°E, 15.4'

May 7, 2020: I found the record monument, a 2.5" diam., 30" long iron pipe tipped almost flat in an old E-W trail. I found the record w. birch (now a stump) and the record maple as shown below. I crossed the record distances and found a distinct cavity that previously contained the iron pipe. At the corner point, I set a 2.4" diam., 30" long aluminum pipe with a 3.3" diam. Oneida Co. aluminum cap flush with the ground surface. I set a blue DEEP-1 magnet adjacent to the monument. I found or established accessories as shown below. I set a white vinyl sign post bearing Northeast, 0.7 ft.

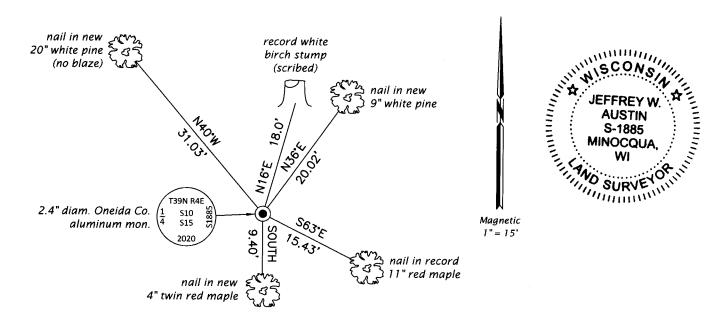

The coordinate value shown has been verified by at least one of the following methods: 1) comparison to a previously GPS determined published value; 2) the value is the average of two or more GPS observations at a markedly different time; 3) one or more distances were measured back to the GPS observed corner from temporary GPS observed offset locations.
