## DETAIL 'A'

GLO RESURVEY of Sec. 16  
by Wesson Cook in 1929

## NOTES

The SW 16 was set by proportion  
The WMC on south line was set east of SW 16 and not  
closed to east line 16  
The SMC in North Two L. was determined from stump  
removal and the bearings and the distances to them  
varied by 5 or so from the original  
The line from that SMC to the E 1/4 21 is straight and  
without a reference to corners along it

See by W.M. Wesson Surveyor, a 1929 resurvey the 2nd survey in 1929's  
Sec. 16, Oneida Co., N.Y. by 1929's date in 1929's
