OF

SECTION BOUNDARIES

AND

SURVEY OF OMITTED LANDS,

SEC. 31,

T. 39 N., R. 11 E.,

Of the Fourth Principal Meridian,

In the State of Wisconsin

EXECUTED BY

Hugh B. Crawford, Cadastral Engineer

Under special instructions dated June 10, 1952, which provided
Supplemental special instructions July 30 1952
for the surveys included under Group No. 65, ~~bearing the approval of the~~

~~Commissioner of the General Land Office under date of~~

Supplemental assignment instructions July 30 1952
and assignment instructions dated June 30, 1952

Survey commenced September 11, 1952

Survey completed October 29, 1952

11119

Dependent Resurvey of Sec. Boundaries and Survey of Lands
Omitted from the Original Survey in Sec. 31, T. 39 N.,
R. 11 E., 4th Prin. Mer., Wisconsin.

The west and south boundaries of T. 39 N., R. 11 E., were surveyed by H. C. Fellows, Deputy Surveyor, in 1859, and the township was subdivided by William E. Daugherty, Deputy Surveyor, in the same year; the official survey is represented on the township plat approved February 4, 1860. The east half of the township was resurveyed by Hugh B. Crawford, Cadastral Engineer, in 1941, as represented on the plat approved November 8, 1943.

The survey is initiated as an administrative measure as the result of correspondence with the Federal Power Commission regarding power development projects of the Wisconsin Valley Improvement Company and the showing on their maps of excess lands adjoining certain lakes within their projects.

Preliminary to the resurvey the lines of the original survey are retraced, and diligent search made for all corner posts, bearing trees and other calls of the original field note record. When duly identified the corner positions are remonumented and new bearing trees marked. Direct control is found for all lines of the resurvey. The true lines, thus adjusted to the identified original evidence, are then duly run and marked through the timber.

The original meander line of Planting Ground Lake is retraced, and the closing error adjusted. This line is established as a fixed boundary from the inlet to the lake to angle point No. 8, which covers the area surveyed as omitted land. The original meander line of Range Line Lake is retraced, and the closing error adjusted. This line is established as a fixed boundary from where it departs from the lake shore on the first course.

The survey to include the lands omitted from the original survey is made in accordance with the provisions of Chapter 3 of the Manual. Planting Ground Lake is accurately meandered in front of the public land area involved; Range Line Lake is accurately meandered in front of the public land area involved.

The survey is executed with a solar transit made by Buff and Buff, serial No. 17997, constructed in accordance with the standard specifications of the Bureau of Land Management. The horizontal circle has a diameter of 4½ inches, with two double opposite verniers reading to single minutes; the vertical circle has a diameter of 4 inches, with one double vernier reading to single minutes. The instrument is equipped with the improved Smith solar attachment, radius of latitude arc 3 inches, and of declination arc 3½ inches, each with verniers reading to single minutes. The instrument was in good condition and was placed in satisfactory adjustment prior to the beginning of the survey.

The directions of all lines herein reported are determined with the solar transit, and verified by a meridian established by an altitude observation of the sun. The measurements are made with a steel tape, 5 chains in length, graduated every link for the first 100 links and the remainder at intervals of 10 links. The tape is tested by comparison with a standard tape and found correct.

Dependent Resurvey of Sec. Boundaries and Survey of Lands
Omitted from the Original Survey in Sec. 31, T. 39 N.,
R. 11 E., 4th Prin. Mer., Wisconsin.

September 11, 1952, at the witness meander cor. bet. secs. 6 and 31, Ts. 38 and 39 N., R. 11 E., on the west shore of Town Line Lake, in approximate latitude 45° 48' 30" N. and longitude 89° 10' 10" W., I make a series of three altitude observations of the sun, each with the telescope in direct and reversed position, observing opposite limbs of the sun, by sighting at a flag erected at the meander cor. of secs. 6 and 31, on the east shore of the lake, and reading the horizontal deflection angles south to the sun.

| Observation | Telescope | Sun | Apparent time p.m. | Vertical angle | Horizontal angle |
|-------------|-----------|-----|--|----------------|------------------|
| 1st | Direct | ☉ | | 31° 55' 00" | 31° 48' 00" |
| 1st | Reversed | ☐ | | 32 19 00 | 32 06 00 |
| | Mean | ☐ | | 32° 07' 00" | 31° 57' 00" |
| 2nd | Reversed | ☉ | | 31° 39' 00" | 31° 16' 30" |
| 2nd | Direct | ☐ | 3 ^h 0 ^m 0 ^s | 31 54 00 | 31 32 00 |
| | Mean | ☐ | | 31° 46' 30" | 31° 24' 15" |
| 3rd | Direct | ☉ | | 31° 16' 00" | 30° 45' 30" |
| 3rd | Reversed | ☐ | | 31 41 00 | 31 07 00 |
| | Mean | ☐ | 3 ^h 0 ^m 0 ^s | 31° 28' 30" | 30° 56' 15" |

By 1st observation flag bears S. 89° 11' 55" E.
By 2nd observation flag bears S. 89° 12' 31" E.
By 3rd observation flag bears S. 89° 12' 29" E.
Mean true bearing of flag S. 89° 12' 18" E.

The declination of the sun for the mean of the three observations is 4° 19' 44" N.

Dependent Resurvey of the South Boundary of Sec. 31,
T. 39 N., R. 11 E., 4th Prin. Mer., Wisconsin.

Reestablishment of a Portion of the Survey Executed by
H. C. Fellows, Deputy Surveyor, in 1859.

The point for the cor. of secs. 5, 6, 31 and 32, Ts. 38 and 39 N., R. 11 E., is determined by measuring 14 ft. south and 33 ft. east from the SE. corner of a fence owned by the town of Three Lakes, Wisconsin; point falls in line with a fence north and near the intersection of improved roads bearing E., W. and S.

At the corner point

Set an iron post, 30 ins. long, 2¹/₂ ins. diam., 36 ins. in the ground, with brass cap mkd.

T 39 N R 11 E
S 31 S 32
S 6 S 5
T 38 N
1952

from which

A birch, 10 ins. diam., bears N. 63¹/₂° E., 128 lks. dist.,
mkd. T39N R11E S32 BT.

An oak, 8 ins. diam., bears S. 38¹/₂° W., 109¹/₂ lks. dist.,
mkd. T38N R11E S6 BT.

3
Dependent Resurvey of the South Boundary of Sec. 31,
T. 39 N., R. 11 E.

Chains

A birch, 7 ins. diam., bears N. $77\frac{1}{2}^{\circ}$ W., 98 lks. dist.,
mkd. T39N R11E S31 BT.

An iron post, 30 ins. long, $2\frac{1}{2}$ ins. diam., set 26 ins. in the
ground, for a reference monument, with brass cap mkd. with an
arrow pointing to the cor. and T39N R11E S32 RM 1952, bears
N. 50° E., 65 lks. dist.

An iron post, 30 ins. long, $2\frac{1}{2}$ ins. diam., set 24 ins. in the
ground, for a reference monument, with brass cap mkd. with an
arrow pointing to the cor. and T38N R11E S6 RM 1952, bears
S. 50° W., 65 lks. dist.

S. $89^{\circ} 49'$ W., bet. secs. 6 and 31, marking and blazing the true
line.

Over gently rolling land, along an improved road, with timber and
undergrowth north and south.

5.20 Road, curves SW.; enter timber and undergrowth.

10.34 Main house of Sunset Bay Resort, bears South, 25 lks. dist.

13.40 Cabin on line.

13.90 Enter swamp, bears N. and SW.

19.90 Leave swamp, bears N. and SE.

21.80 Road, bears NW. and SE.; thence along south side of clearing.

27.28 The point for the meander cor. of secs. 6 and 31, on east shore of
Town Line Lake, is marked with an iron well pipe, $1\frac{1}{2}$ ins. diam.,
protruding 16 ins. above the ground. This point is said to be
the preserved original meander cor. point.

At the corner point

Set an iron post, 30 ins. long, $2\frac{1}{2}$ ins. diam., 26 ins. in the
ground, with brass cap mkd.

1119

19
Survey of Lands Omitted from the Original Survey
in Sec. 31, T. 39 N., R. 11 E.

General Description.

The land omitted from the original survey and included in this survey, opposite Planting Ground Lake, is mostly high rolling upland, with some level swampland; the upland reaches approximately 60 ft. above the water level of Planting Ground Lake. The soil is a sandy loam, with some gravel and stone.

The upland supports a coverage crop of poplar, birch, maple, oak, Norway pine and white pine, ranging in size from 4 to 24 ins. diam. The swamp area has a fair stand of spruce, with some tamarack; a small pond lies in this area. Some of the larger pine timber was removed during early logging operations.

A partly improved road crosses the area, and a new road was under construction at the time of this survey. The area has been subdivided into tracts of varying sizes, with several small lots fronting on Planting Ground Lake; the lake front lots have houses on them.

The land omitted from the original survey and included in this survey, opposite Range Line Lake, is mostly high rolling and gently rolling upland, with two areas of level swampland; the upland reaches approximately 40 ft. above the water level of Range Line Lake. The soil is a sandy loam, with some gravel and stone.

The northern part of the area has been cleared for farming but is now grass land; the southern part of the area has a coverage crop of poplar, birch, maple, oak, Norway and white pine on the upland, and the swamp areas have some spruce and tamarack. The timber ranges in size from 4 to 20 ins. diam. Some of the older timber was removed during early logging operations.

The Evangelic Luthern Synod has a resort in the northern part of the area, opposite lot 2, with six good housekeeping cabins and a private road leading to them. Mrs. Reiter has a resort in lot 4, and a good housekeeping cabin on the area opposite her other cabins. There is an unimproved road leading across the area to the east shore of Range Line Lake.

The formation of the two bodies of land omitted from the original survey and included in this survey is similar in every respect to the adjacent surveyed land. Some of the older stumps on the areas indicate that the trees were well over 100 years old at the time they were cut many years ago.

On the evidence developed, it is concluded that the unsurveyed areas were in existence in 1848, when Wisconsin was admitted into the Union, in 1859, when the township was subdivided, and at all subsequent dates, and therefore have the status of public land.

There are no surface indications of mineral deposits; however the areas are relatively near the iron ore region of upper Michigan.

Each of the subdivisions of public land included in this survey, namely lots 10, 11, 12, 13, and 14, sec. 31, is more than 50% upland in character.

CERTIFICATE OF CADASTRAL ENGINEER

I, Hugh B. Crawford, HEREBY CERTIFY upon honor that, in
pursuance of special instructions bearing date of the 10th day of June, 1952,
Supplemental special instructions 30th July 1952
I have ~~surveyed~~ made the ~~dependant~~ resurvey of section boundaries and survey of
omitted lands in sec. 31, T. 39 N., R. 11 E.,

of the Fourth Principal Meridian, in the State of Wisconsin, which are
represented in the foregoing field notes as having been executed by me and under my direction; and that
said survey has been made in strict conformity with said instructions, the Manual of Instructions for the
Survey of the Public Lands of the United States, and in the specific manner described in the foregoing
field notes.

Denver, Colorado,
March 27, 1953.

Hugh B. Crawford
Cadastral Engineer

CERTIFICATE OF APPROVAL

BUREAU OF LAND MANAGEMENT,

Washington, D. C., NOV 16 1953, 19

The foregoing field notes of the ~~survey of~~ dependant resurvey of section boundaries and
survey of omitted lands in sec. 31, T. 39 N., R. 11 E., 4th Prin. Mer., Wisconsin

executed by Hugh B. Crawford

having been critically examined and found correct, are hereby approved.

(Sgd) Donald B. Clement

Assistant Chief, Division of Cadastral Engineering.

CERTIFICATE OF TRANSCRIPT

I CERTIFY that the foregoing transcript of the field notes of the above-described surveys in
Wisconsin, is a true copy of the original field notes.

Donald B. Clement

Assistant Chief, Division of Cadastral Engineering.
