SURVEY NOTES

This survey was made by North Country Surveyors persuant to United States Department of Agriculture, Forest Service Contract "No. 53-56A6-4-00035, Cadastral Survey" for the purpose of recovering, restoring, establishing, marking and perpetuating the corners and boundary lines of the U. S. Government land on the perimeter and within Section 15, T39N, RllE, Fourth Principal Meridian, Oneida County, Wisconsin as shown on the plat herewith.

The original Government subdivision survey of this township was made by William E. Daugherty in 1859.

Two separate Dependent Resurveys have been made tying and establishing various corners of Section 15. One of those resurveys was made by Guy R. Veal, U.S. Cadastral Engineer and dated June 21, 1926. This survey was made to define omitted lands within Section 23. The second resurvey affecting the area is a resurvey of the East half of T39N, R11E, and was completed by Hugh D. Crawford, Cadastral Surveyor on October 18, 1941. Monuments established in these surveys were recovered and this along with the notes of the survey are the basis for this survey.

Bearings between corner positions are true bearings by reference to a solar observation. All distances shown thereon are in feet and hundredths of feet. The control traverse was measured by use of electronic distance measuring equipment. Corners recovered, restored and established by this survey are marked by the monument described in the map legend. Each monumented corner position is referenced to blazed and scribed bearing trees and described objects.
