Tried Daughan's course and distance
 and found that the distance would not
 bring me into such a position that a line
 drawn East from the Corner would
 touch the creek at all.

Took up plants in bridge and found
 a notch in an old pine log used as
 a back log for bridge; this notch was
 said to be the point where the old
 stake stood. Could not set monument
 in old bridge because high water and
 ice would be likely to wash out same.
 Consequently I set monument 19 1/2

 back log. This position conforms to
 the $\frac{1}{4}$ of Roads to N.-S.-E. West
 and also to the East.

Affidavit of H. H. Stolle

I, H. H. Stolle, Chairman of Town of Soma, Lincoln County, Wis., certify that the position and location of the $\frac{1}{4}$ Sec. Corner between Sections Ten (10) and Fifteen (15) in T. 35 N. of R. 4 E. is known to me and I have pointed out the approximate point and, Burnett, Surveyor, has set monument accordingly which is correct in fact according to my best judgment and belief.
