

Scale - 1-inch = 100 Ft.

Surveyors Certificate

I, Harry C. Hall, do hereby certify, that the above plat correctly represents my survey of part of N.E. 1/4 - N.E. 1/4 Sec. 9 - T. 36 N. R. 9 E, Oneida County, Wis. Made in April - 1938 at the request of the Rhinelander Building and Loan Assn. That the Original Northeast corner of the section, lost for many years was found and fully identified by us through Bearing Trees and Iron Marks. That the discrepancy in Mr. Vaughan's measurement to the true measurement on the south line was caused by the erroneous location of his southeast corner. That said corner is not on the east section line. That nearly twelve thousand feet was run and measured to get the information shown.
