January 12, 1995

Recovered, verified, and marked monuments at the corner locations shown hereon as follows:

- = Iron monument found in place and marked with flagged lath stake.
- /// = Lot lines marked approximately with flagged lath stakes.

This survey was completed for the purpose of locating existing lot corners and flagging approximate lot lines by the order of Larry Ballard, who has executed a written waiver for all other requirements of Wis. Adm. Code Chap. A-E 7. A closed traverse was not made and the minimum accuracy is 1 part in 100 and plus or minus 2°.

- = 1-1/2" iron pipe found
- () = previously recorded

Scale:
 1" = 30'

This survey was made for Larry Ballard, hereafter referred to as Client. A written agreement has been made between Inman-Foltz and Associates, Inc. and Client to exclude this survey from the requirements of Wisconsin Administrative Code Chapter A-E 7. The requirements not being complied with are: 1) A field survey traversing and connecting monuments necessary for location of the parcel(s) owned by Client has not been made; 2) Monuments were not set to mark the corners of the parcel(s); 3) No legal description of the parcel(s) has been provided or shown on this map; 4) The exact lengths and bearings of the boundaries of the parcel(s) owned by Client have not been shown on this map; 5) The relationship to the surveyed parcel(s) of the monuments used for determining the location of the parcel(s) owned by Client have not been shown by bearing and distance on this map; and 6) The measurements made in performing this survey work do not conform to the minimum accuracy requirements of 1 part in 3000 for linear measurements, or 30 seconds per angle but not more 120 seconds total angular closure for closed traverses.

This survey is correct to the best of my knowledge and belief.
