OF THE

DEPENDENT RESURVEY AND EXTENSION SURVEY

INCLUDING LANDS ERRONEOUSLY OMITTED

FROM THE ORIGINAL SURVEY,

BORDERING ON CRESCENT LAKE,

IN SECTIONS 16 AND 21,

TOWNSHIP 36 NORTH, RANGE 8 EAST,

Of the **FOURTH PRINCIPAL** *Meridian,*

In the State of **WISCONSIN**

EXECUTED BY

Hal D. Craig, Surveyor

Lester S. Marn, Public Land Surveyor

supplemental
Under special instructions dated **July 26**, 1939, which provided
for the surveys included under Group No. **47**, bearing the approval of the
Commissioner of the General Land Office under date of **August 7, 1939**
and assignment instructions dated **August 7, 1939**
August 21, 1939

Survey commenced **September 18, 1939**

Survey completed **October 11, 1939**

L8639

1.

Dependent Resurvey and Extension Survey, Secs. 16 and 21,
T. 36 N., R. 8 E., 4th Principal Meridian, Wisconsin.

The subdivisional lines of T. 36 N., R. 8 E., were surveyed by William E. Daugherty, Deputy Surveyor, in 1863, as represented on the official township plat, approved March 18, 1864. The following notes are those of a dependent resurvey, or reestablishment of the original boundaries of Secs. 16, 17, 20, and 21 of the township, and the extension survey including public lands bordering on Crescent Lake in Secs. 16 and 21, which were erroneously omitted from the original survey.

The resurvey is a complete restoration of the original boundaries of Secs. 16, 17, 20, and 21, in the true original positions, according to the best available evidence of the original survey.

Before reconstructing or restoring the corners, the lines of the original survey were retraced and search was made for evidence of the original corner posts and bearing trees and other calls of the field notes. When duly identified or restored, the corner positions were remonumented and new bearing trees marked. After completing the retracements, the true lines were duly run and marked through the timber. In order to simplify the record, only the true line notes are supplied here, which refer to the completed resurvey.

A considerable area of land bordering on Crescent Lake in Secs. 16 and 21, was omitted from the original survey by reason of the grossly erroneous character of the reported original meanders of the lake in that sections. The land so omitted has the status of unsurveyed public land. The original meander courses adjacent to the omitted lands have been established as a fixed boundary, with the directions and lengths of the several courses adjusted to the record of the original survey.

The survey was executed with a light mountain solar transit made by Buff and Buff, Serial No. 14238, constructed in accordance with the standard specifications of the General Land Office. The horizontal circle has a diameter of $4\frac{1}{2}$ ins., with two double opposite verniers reading to single minutes; the vertical circle has a diameter of 4 ins., with one double vernier reading to single minutes; the telescope has fixed stadia wires, ratio 1:132, with a focal constant of 1.2 links. The instrument is equipped with the improved Smith Solar attachment, radius of latitude arc $2\frac{1}{2}$ ins., and of declination arc $3\frac{1}{2}$ ins., each with verniers reading to single minutes. The instrument was in good adjustment, having been placed in satisfactory condition prior to beginning the survey.

The survey was executed by the transit angle method turned from the true meridian or by the solar transit method. The measurements were made with a Lallie steel tape, 5 chains in length, graduated every link for the first 100 links, and thereafter at intervals of 10 links. The tape was tested by comparison with a Lufkin Standard tape and found correct. The measurements were made on the slope, and the vertical angle of each interval was ascertained by a clinometer in good adjustment; the horizontal equivalents are entered in the field note record.

September 17, 1939, at my field office headquarters near Rhinelander, Wisconsin, Sec. 35, T. 37 N., R. 8 E., 4th Prin. Mer., in latitude $45^{\circ} 39' 20''$ N., and longitude $89^{\circ} 26' W.$, I make an hour angle observation of Polaris, east of the meridian, two each with the telescope in direct and reversed positions reading the horizontal deflection angle from a reference point to the NE. 20 chs. distant. The watch time of the observation was checked with a Western Union telegraph clock and found correct.

Watch time of observation ----- 6h 25m 22s p.m.
 Mean horizontal angle from the reference point
 to Polaris ----- $55^{\circ} 03' 30''$
 Azimuth of Polaris ----- $1^{\circ} 18' 30''$
 Mean true bearing to reference point ----- $N.56^{\circ} 22' 00'' E.$

Dependent Resurvey and Extension Survey, Secs. 16 and 21,
T. 36 N., R. 8 E., 4th Principal Meridian, Wisconsin.

Every 30 minutes from 7 to 10:30 a.m. and from 1:30 to 5 p.m., I make proper settings on the arcs of the solar attachment and ascertain that the resulting orientation of the instrument, when compared with the meridian established by Polaris observation, has a maximum error of less than 1' 30".

I repeat the tests of the arcs daily by noon observation, and verify the meridional indications at frequent intervals throughout the survey.

Dependent Resurvey of a Portion of the Subdivisional Lines of T. 36 N., R. 8 E., as Originally Surveyed by William E. Daugherty, Deputy Surveyor, in 1863.

Survey commenced at the point for the cor. of secs. 8, 9, 16, and 17, marked by an iron pipe, 2 ins. diam., set flush with the surface of muskeg in swamp.

In place of the iron pipe,

Set a concrete monument, 24 ins. long, 6 ins. diam., 18 ins. in the ground, for the cor. of secs. 8, 9, 16, and 17, with brass tablet, $\frac{3}{4}$ ins. diam., 3 in. stem, embedded in top and mkd.,

T 36 N R 8 E	
S 8	S 9
<hr/>	
S 17	S 16

1939

from which,

The remains of an original bearing tree,

A white pine stump, 16 ins. diam., bears N. $61\frac{1}{2}^{\circ}$ E., 216 lks. dist., has plain scribe mks. "B T"

Find no evidence of the other bearing tree.

And new bearing trees,

A white pine, 10 ins. diam., bears N. $44\frac{1}{4}^{\circ}$ E., 77 lks. dist., mkd. T 36 N R 8 E S 9. B T

A white pine, 6 ins. diam., bears S. $39\frac{1}{2}^{\circ}$ E., 11 lks. dist., mkd. T 36 N R 8 E S 16 B T

A white pine, 6 ins. diam., bears S. $41\frac{1}{2}^{\circ}$ W., 14 lks. dist., mkd. T 36 N R 8 E S 17 B T

A white pine, 8 ins. diam., bears N. $51\frac{1}{2}^{\circ}$ W., 115 lks. dist., mkd. T 36 N R 8 E S 8 B T

A square pine post, 6 ins. X 6 ins. with 2 ft. of it above ground, bears S. $59\frac{1}{2}^{\circ}$ W., 72 lks. distant. The points of two older stakes, both 2 ins. diam., are along the NE. and S. side of the pine post.

Thence,

S. $87^{\circ} 41'$ E., bet. secs. 9 and 16, marking and blazing the true line.

Over level swamp land, through spruce, tamarack, and pine timber.

5.90 Leave swamp, thence over rolling land, through young poplar, birch, oak, and pine timber with undergrowth of young trees, alder, sumac, and briars.

17.20 A graded road, bears NE. and SW.

Dependent Resurvey and Extension Survey, Secs. 16 and 21,
T. 36 N., R. 8 E., 4th Principal Meridian, Wisconsin.

Chains	No accessories available. on rolling land.
	Land, rolling. Soil, sandy clay mixed with stone and gravel, 2nd rate. Timber, poplar, maple, birch, oak, pine, basswood, elm, spruce, and tamarack; undergrowth, young trees, hazel brush, sumac, and brier.
	N. 16° 49' W., bet. secs. 20 and 21.
	Over rolling cleared land.
3.70	A creek, 10 lks. wide, 12 ins. deep, course SW.
9.90	The NE. cor. of John Hacker's house, 32 ft. X 48 ft., bears W., 47 lks. dist.
11.60	Intersect a frame barn, 40 ft. X 100 ft., 24 lks. from the SE. cor.
14.10	Enter timber and undergrowth, bears N. and S.
27.47	The point for the $\frac{1}{4}$ sec. cor., marked by the remains of a rotted stake, 3 ins. square, marked with a scribe " $\frac{1}{4}$ S" and is along side of a large fence post, fence bears E. and W.
	Set a concrete monument, 24 ins. long, 6 ins. diam., 18 ins. in the ground, for the $\frac{1}{2}$ sec. cor., with brass tablet, $3\frac{1}{2}$ ins. diam., 3 in. stem, embedded in top and mkd.,
	S 20 S 21
	1939 survey from which,
	Vaughn's bearing trees,
	A red oak, 12 ins. diam., bears S. 18° E., 30 lks. dist., mkd. on the bark " $\frac{1}{4}$ S B T", remark $\frac{1}{2}$ S 21 B T
	A hemlock, 16 ins. diam., bears S. $47\frac{1}{2}$ W., 33 lks. dist., mkd. " $\frac{1}{4}$ S B T" add marks B T
	And local bearing trees,
	A dead hemlock, 12 ins. diam., bears S. $85\frac{1}{4}$ W., 46 lks. dist., mkd. $\frac{1}{4}$ S B T
	This point for the $\frac{1}{4}$ sec. cor. was accepted only after interviewing several old men that had known about the corner as established by B. F. Dorr, former District Surveyor. Dorr's reputation as a competent surveyor was well known by everyone. In his field notes dated 1890, Dorr accepted a point for the meander cor. of secs. 20 and 21 and established the $\frac{1}{4}$ sec. cor. by proportion on the true line. These lines have been recognized by the adjoining land owners and improvements have been built to them. D. H. Vaughn, Surveyor, later found Dorr's location for the $\frac{1}{4}$ sec. cor. of secs. 20 and 21 and marked new bearing trees which were used to identify the point for the corner.
36.82	The point for the meander cor. of frac. secs. 20 and 21, determined by using the bearing and index error as found on the line between the $\frac{1}{4}$ sec. cor. and the cor. of secs. 20, 21, 28, and 29. The point for the cor. falls in a cleared field on what appears to be the old bank of Crescent Lake.
	Set a concrete monument, 24 ins. long, 6 ins. diam., 22 ins. in the ground, for the meander cor. of frac. secs. 20 and 21, with brass tablet, $3\frac{1}{2}$ ins. diam., 3 in. stem, embedded in top and mkd.,

Land, rolling or level swamp.

Soil, sandy clay mixed with stone and gravel, 2nd rate; in the
swamps it is muck, 3rd rate.

Timber, poplar, birch, pine, hemlock, maple, oak, and basswood on
the upland, in the swamps it consists of spruce, tamarack, and cedar;
undergrowth, young trees, hazel brush, alder, and brier.

From the cor. of secs. 20, 21, 28, and 29, previously described.

S. $89^{\circ} 41'$ W., bet. secs. 20 and 29, marking and blazing the true
line.

Over rolling cleared land, along a fence.

2.82 A creek, 10 lks. wide, 12 ins. deep, course S. 20° W.

6.68 A fence, bears N. and S.

19.50 End of fence, fence bears N. and S. along road.

19.85 A graded road, bears N. $11\frac{1}{2}^{\circ}$ W. and S. $2\frac{1}{4}^{\circ}$ W.

39.54 The point for the $\frac{1}{4}$ sec. cor. as obtained from local information and
accepted as the best available evidence of the original position for
the corner. This point is along side of a fence corner post from
which fences bear N. 8° W. and S. $89^{\circ} 10'$ W.; there is no remaining
evidence of the original corner post or bearing trees.

Set a concrete monument, 2 $\frac{1}{4}$ ins. long, 6 ins. diam., 20 ins. in the
ground, for the $\frac{1}{4}$ sec. cor., with brass tablet, $3\frac{1}{2}$ ins. diam., 3 in.

T. 36 N., R. 8 E., 4th Principal Meridian, Wisconsin.

Chains

From this point, the cor. of secs. 8, 9, 16, and 17, bears
N. $89^{\circ}31'$ E., 65.53 chs.

Land, rolling.

Soil, sandy clay mixed with stone and gravel, 3rd rate, or muck,
3rd rate.

Timber, poplar, birch, oak, maple, pine, hemlock, and basswood;
undergrowth, young trees, hazel brush, alder, and brier.

Establishment of a Portion of the Recorded
Original Meander Line of Crescent Lake, in
Secs. 16 and 21, as a fixed and Limiting
Boundary.

The recorded original meander line of Crescent Lake in secs. 16 and 21 is grossly erroneous and fails to represent the approximate position of the actual lake. As a result of the erroneous record, a considerable area of high, rolling upland is situated between the position of the record meander line and the actual shore line of the lake. In order to define the extent of this omitted public land area, the portion of the original meander line adjacent thereto is established on the ground as a fixed boundary.

Preliminary to the establishment of the original meander line of Crescent Lake in secs. 16 and 21, the latitudes and departures of the recorded meander courses were calculated and adjusted to a closing with the restored section boundaries, distributing the closing error along the several meander courses in proportion to the length of each course, adopting new courses to the nearest minute, with lengths to the nearest link; a similar distribution was made of the closing error of the present survey, with resulting lines on the ground as follows:

From the reestablished meander cor. of frac. secs. 16 and 21, which bears N. $89^{\circ}42'$ W., 46.81 chs. dist. from the cor. of secs. 15, 16, 21, and 22,

Thence with the adjusted record meander courses in sec. 16:

N. $6^{\circ}08'$ E., over rolling land, through timber and undergrowth.

3.00 Enter dry spruce swamp, bears NW. and SE.

4.41 Adjusted position for angle point 1.

Set an iron post, 3 ft. long, 1 in. diam., 28 ins. in the ground,
for angle point 1, sec. 16, with brass cap mkd.

S. $63^{\circ}00'$ E., 1.80 "

S. $43^{\circ}45'$ E., 2.42 " To the meander cor. of frac. secs. 21 and 22 on the S. shore of the bay of the lake.

Land, level lake shore.

Soil, muck in swamp, 4th rate.

Timber, spruce, tamarack, and pine; undergrowth, young trees, alder, and willow.

General Description.

The omitted public land area, designated as lots 7, 8, 9, 10, and 11, sec. 16, and lots 9 and 10, sec. 21, is principally high, rolling upland, reaching a maximum elevation of 50 ft. above the level of the nearby lakes. Lots 7, 8, 10, and 11, sec. 16, and lots 9 and 10, sec. 21, contain small areas of swamp land but each lot is more than 50% upland; lot 9, sec. 16, is all upland. The soil is a sandy clay loam, with stone and gravel in portions of the surveyed areas.

The entire area except for the swamps has been heavily timbered with pine, oak, hemlock, maple, birch, poplar, spruce, balsam, basswood, and ironwood. The original timber growth was cut many years ago and the stumps are badly burned and rotted. Many of the trees were from 20 to 40 inches in diameter at the time of cutting. The upland area is now covered with a heavy growth of young poplar, pine, birch, oak, and maple timber, and undergrowth. The timber in the swamps is spruce, tamarack and cedar.

The remains of the original timber growth, the elevation of the upland in comparison with the lake levels, and the character of the soil afford abundant proof that the land was in place and well above the lake levels in 1848, when Wisconsin was admitted into the Union, and in 1863, the year in which the township was subdivided. The soil, timber, and elevation of the omitted lands does not differ from that of the adjoining lands which were included in the original survey.

Dependent Resurvey and Extension Survey, Secs. 16 and 21,
T. 36 N., R. 8 E., 4th Principal Meridian, Wisconsin.

Crescent Lake, Bass Lake, and Lake Erra, are navigable lakes. The present level of Crescent Lake is about 5 ft. lower than its normal level at the time of the original survey. This condition was brought about by dredging the outlet of the lake to facilitate logging operations in this region many years ago. The lowering of the water level has created a strip of land between the old bank and the present shore line which has an average width of about 2.00 chs. This area is covered with a good growth of young poplar, pine, elm and willow timber.

The improvements in sec. 16 consist of a well graded road which winds through the section a short distance east of the shore of Crescent Lake; an abandoned clearing on the south shore of Bass Lake, which was the site of a former logging camp; and a clearing of about 10 acres in lot 10. There is one cottage 18 by 24 ft. in size located on the shore of Crescent Lake in lot 10, sec. 16. Partly improved roads lead to eight cottages located along the lake shore in sec. 21; the cottages are part of the Smith resort property. The main lodge of this resort is located near the north line of sec. 21.
